- 6. Som, 5 light A., at Get4 004854.
 7. Def woods pipeline for the water supply to Sola A/F. The pipeline some from folded lever, Shangaland by Sentines and Forms A/F to 1 structured at 001864. The besin is sumfaint to the earth and covered with ture, built of concrete that the series of the whole the pipelines is suith that the seaters and of the whole attractions. The beaint is not feel through a 10° tron pressure attractions. The beaint is not the three and of the whole attractions. The beaint is feel through a 10° tron pressure at 10° tron pressure.
 8 x 1.6 m and 50 m. 10m, gen given from the nountaint to the
 - 2 x 1.8 m. and 30, m. long down from the mountain to the road at bits! lake (Grid 9180). The week point of the tunnel is the so-called "Ventil-chamber", a vertical pit 45 m. from the intake to Grina Lake.
 - 10. 3 light A.A., 3 l ght S/L. 777833.
- 11. Raege. 6 heavy A.A. now reported to be durmies. 774824.
- 12. Stangeland in Sol. 3 light A.A.
- 13. Stangoland in Sols. 12 heavy A.L. at 793822, poss. D.P.

15. All along the road from Soma to Stangeland a great many built. Munerous petrol barrels in dumps of about 15 laid out on both sides of the roads leading from Soma in

- Röyneberg. 3 light A.A. 818859.
- 3 light A.A. 821860.

 - 3 light A.A. 840866.
 - Ammunition dump. Infantry and light A.A. ammunition. Jastten. 7/2 and A.O.P. on the top of the knoll. Amminition dump on the northern slope. The radio masts
- this report has not been confirmed.
- 4 M.G.'s, one pillbox used as shelter and an open M.G. nest 7. 3 light A.A. 822848.

- The main draining canal for the A/F area. The whole A/F is built on the bottom of a lake, which was drained out extremely boggy, and extensive draining was necessary. The original draining canal leads through a tunnel under that was not enough to make the site usable as an A/F. and the Germans therefore, in 1940, had to undertake the construction of a new canal to the Gannafford. This was a very difficult task, the canal just west and east of the that it repeatedly caved in. It is said, that the work was only made possible th ugh the long spell of dry weather during the summer and autumn of 1940.
- 11. Barracks, living quarters of the ground personnel of the
- Petrol tanks camouflaged as a red-painted house some 100 m. south of the railway st.
